

## Release Notes

### **NX System Release 21.3**

April 2024

#### **Component Version**

- NX Editor Version: 1.21.274
- NX Tester Firmware Version: 2.21.381

#### **New Features and Enhancements**

- When using the “Test-LED Guided” Workflow item with “LED Only” mode, the ProbeAssist function is now supported.
- When using the “Test-LED Guided” Workflow item, allow for a BIN detection switch that will turn off the light and then advance to the next step.
- No longer include Hipot IR values on connection reports for programs that do not include a Hipot workflow item.
- Enhanced diagnostics to eliminate erroneous Error 653 messages.

***NOTE: It is strongly recommended that the upgrade be applied to the NX Testers and the NX Editor simultaneously. Make sure that all programs are backed up prior to updating the NX Tester firmware, especially any customized template files located in the “New File Based On” directory. After installation of the NX Editor, the customized template files will need to be restored to a new template directory: \\NX Data\\Templates\\New Programs.***
