

## ABR Feature Code Import Utility

The ABR Feature Code Import Utility was created for the purpose of importing Feature Codes and associated Phases from a spreadsheet into a .ABR file.

Column “A” is the Feature Code and column “B” and after are associated Phases.

	A	B	C	D
1	3958778F92	YC_D	YD_D	
2	3958781F92	YC_D	YB_D	
3	3958782F92	YC_D	YB_D	
4	3958907F91	DA_D	NL_D	
5	3958908F91	DA_D	NL_D	
6	3959072F91	VH_D		
7	3959073F91	VH_D		
8	3959075F91	PB_D	RW_D	
9	3959076F91	PB_D	RW_D	
10	3978184F91	GJ_D	GE_D	GD_D

Launch “ABRFeatureCodeImportUtility.exe”

1. Select the Feature Code spreadsheet file.
2. Select the ABR Master File
3. Select “Import Feature Codes

This application does not have any error checking or log files.

- If the Phase does not exist, then it will not be selected.
- If the Feature Code already exists, an invalid duplicate will be created
